WORK EXPERIENCE

Project Contributor (Project Exhibition, Vit Bhopal)

02/2025 - 05/2025

As a key member of the team, I guided the development of this image recognition model, managing the project from initial concept to final implementation. I was responsible for defining the project scope, assigning tasks, and ensuring all milestones were met. My role was to provide strategic direction for the CNN architecture and to validate the final model's performance against the project's goals

Project Contributor (Project Exhibition-Vit Bhopal)

09/2024 - 01/2025

All-in-one platform that allows users to access emergency services, schedule appointments, and communicate with healthcare professionals remotely. Additionally, managing medical records, organizing home visits for pathology tests, and quick access to doctors during emergencies are fragmented across various platforms.
